

## **Private construction measures**

On these pages you can find out what you need to consider when constructing property access roads, private utility lines and facades that directly border - or build over - urban traffic areas.

## Property access ►

## Shaft structures ►

## Private supply lines ►

## Facade renovation ►

## Processing time

The processing time for the construction measure to be applied for is **about six weeks**. A site visit with a member of staff from the "Mobility and Environment" department must be arranged for each construction project.
